**MITSUBISHI LAUNCHES HIGH-PERFORMANCE NINE-CHANNEL  
DIGITAL VIDEO RECORDER AT ASIS 2006**

*New DX-TL4509U brings Mitsubishi quality and reliability to small and mid-size installations;  
DVR offers powerful features and superb image quality*

**IRVINE, Calif., September 25, 2006** — With outstanding video image quality and a category-leading user interface, Mitsubishi Digital Electronics America today introduced its nine-channel DX-TL4509U Digital Video Recorder with JPEG2000 video compression at the ASIS 2006 Expo. The DX-TL4509U features a built-in integrated CD/DVD drive for quick and easy duplication of video data, thus saving time and money. It is ideal for a wide variety of security applications in small- to mid-sized facilities including service stations, convenience stores and small retail.

Sharing many features with Mitsubishi's high end DX-TL5000U DVR, the DX-TL4509U is smaller in size and price, yet offers an array of advanced features critical in today's security market. The DX-TL4509U provides real-time monitoring with 540 pictures per second and high-density recording up to 120 pictures per second, resulting in high-end video in both live and playback modes. Featuring a motion detection function with five sensitivity settings and up to 418 detection dots, the new DVR provides maximum surveillance capability at a competitive price.

“With the DX-TL4509U, we are offering a very reliable, nine-channel DVR that not only delivers outstanding performance in a compact package, but does so at a reasonable price,” said Jeff Kiuchi, product specialist, Mitsubishi Digital Electronics America Security Products.

The DX-TL4509U joins the DX-TL4516U in Mitsubishi's DX-TL4500U series, whose features include dual multiplexer outputs for simultaneous live and record viewing on two monitors, auto set up for automated programming, built-in network for remote view and programming, and a USB

mouse for simple set up using a GUI interface. Both units also feature pan/tilt/zoom control of dome cameras, long pre-alarm recording, up to one terabyte (TB) internal storage capacity with optional seven TB external storage, mirroring functionality, alarm partitions and emergency recording.

The Mitsubishi DX-TL4509U, DX-TL4516U and DX-TL5000U DVRs are backed by an industry-leading five-year limited warranty, as well as Mitsubishi's unique Emergency Replacement Assistance that provides replacement product within 24-hours in the event of specific system failure.

### **About Mitsubishi Digital Electronics America**

Headquartered in Irvine, Calif., Mitsubishi Digital Electronics America, Inc. is a subsidiary of Mitsubishi Electric Corporation of Japan, a worldwide leader in premium quality imaging and presentation products that set the standard in innovation, performance and reliability.

Mitsubishi Digital Electronics America's Imaging Products Division has more than two decades of manufacturing experience and technology leadership.
